Allowable Subject Matter

1. Claims **1-4 and 6-20** (*renumbered 1-19, respectively*) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding *amended* claim **1**, *Yagil et al.* (U.S. 6,732,315) teaches a HomePNA system where bandwidths greater than the 4 to 10 MHz band defined in the HomePNA 2.0x specification are used. *Yagil et al.* fails to teach where the bandwidth of the extended bandwidth signal includes more than one and one half copies of a spectrum of a 4 Mbaud signal.

Regarding claims **2-4 and 6-13**, these claims are further limiting to claim **1** and are thus also allowable over the prior art of record.

Regarding *amended* claim **14**, *Yagil et al.* (U.S. 6,732,315) teaches a HomePNA system where bandwidths greater than the 4 to 10 MHz band defined in the HomePNA 2.0x specification are used. *Yagil et al.* fails to teach where the bandwidth of the extended bandwidth signal includes more than one and one half copies of a spectrum of a 4 Mbaud signal.

Regarding claim **15**, the prior art of record fails to teach a training sequence generation method that upsamples a 2 Mbaud signal to an 8 Mbaud signal, modulates the 8 Mbaud signal with a 1 MHz signal, filters the modulated 8 Mbaud signal producing a filtered signal with a 12MHz wide baseband spectrum, and modulates the filtered signal with a 10MHz carrier signal to produce the training sequence.

Regarding claims **16-20**, these claims are further limiting to claim **15** and are thus also allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yagil et al. (U.S. 6,732,315) as well as Wu (U.S. 6,922,407) are references pertinent to this application.
